**Sustainability & traceability are becoming more & more important to us & to our guests so look for the symbols below on the list to help you choose a wine most suited to you.**

**ORGANIC (ORG)**

Organic Wine is made with no added synthetic pesticides, herbicides or any other chemicals like artificial fertilisers. The wines are accredited by the country's relevant organisation such as The Soil Association of Britain. Many more producers operate to "organic principles" but may be too small or too stubborn to go through the rigorous certification process.

**VEGETARIAN (VG)**

It may seem that a beverage made from pressed & fermented grapes should be vegetarian, but animal derivatives can be used in the fining process, such as Isinglass for example.

**VEGAN (V)**

Vegan wines don't contain fining or clarifying agents (like egg white or Casein).

**SUSTAINABLY PRODUCED (SP)**

Sustainable Winegrowing is a comprehensive set of practices that are environmentally sound, socially equitable & economically viable. They work to conserve energy, maintain healthy soil, protect air & water quality, enhance relations with communities, preserve ecosystems & improve the vitality of vineyards & wineries. Different wine regions have different challenges & each country has their own certifying body.

Please inform us of any allergies we should be made aware of.  
All wines served by the glass are available in 125ml measures on request.
